SUMMARY

I am an avid full-stack developer with skills in front-end and back-end web applications. I love to learn and creatively solve problems. With a Master's degree in Computer Applications, I have high-level proficiency in HTML, CSS, Java, Javascript, jQuery, Bootstrap, and, Ajax.

Having an appetite for continuous learning, collaboration, and problem-solving, I plan to create and maintain websites and building applications. I am currently enrolled in Rutgers Coding Bootcamp to sharpen my skills in web development. Looking to bring my attention to detail and technical skills to a company to grow and become a valuable asset.

EDUCATION
